

Community Camera Program

Do you currently utilize private video surveillance at your home or business?

Video surveillance is one of the best methods for apprehending criminals and convicting suspects by catching them while they are in the act of committing a crime. Installing video surveillance is an excellent example of community-police partnerships; something we highly value as a police agency serving our community.

How Does it Work?

Many business owners and residents currently operate surveillance systems at their businesses or homes. As crimes occur nearby, they are not always aware that their system may have captured footage that could help solve the crime, thus keeping our community safer. In turn, the police are also not always aware who may have this potentially vital information. The Oldham County Police Department is asking

residents and businesses across the county to register their privately owned surveillance camera systems. As we respond to criminal incidents, we may be able to use the information or footage gathered from the security cameras to assist in the apprehension and prosecution of the criminals involved.
